PROFESSIONAL PEEL SYSTEM

Pro Radiance Peel active brighteners + LSS™ delivery – Lactic Acid Peel, that is a leave on peel that you **do not wash off**. An excellent lactic acid cosmetic exfoliation for all skin types, conditions, and colors. This may be used as your first initial application when working with sensitive, sun damaged, oily / troubled, or darker skins.

This professional brightening complex may be used before Skin for Life Professional Peel salicylic, lactic, citric as a preparation for increased peel performance. May be used after microdermabrasion as a high definition peel to reach skin success.

Professional Peel Salicylic, Lactic, Citric –

Skin must be prepped for 2 – 4 weeks before performing a professional peel. The appropriate products that you must use are Renewal Serum 10% lactic concentrate and/or Vita A Regenerate. *(remember we also have a new launch of vitamin A products coming out January 1st.)*

Our peel system may be performed *after* Microdermabrasion for additional skin change or you may perform our professional peel *before* Oxygen Infusion.

Our professional cosmetic acid peel system is unique and we would like to share our Top 5 reasons why...

1. It is a SMARTPeel - the immunity acids are there to minimize the unnecessary inflammation that is responsible for PHI "Post Inflammatory Hyperpigmentation"
2. Skin Tone Friendly - not all skin colors are wise to endure cosmetic acid peels. Be smart when selecting a cosmetic acid for darker skin tones or hormonal challenged skins. Our cosmetic acid peel may be used on Fitzpatrick I - IV. Safety first - prepare skin before any cosmetic acid peel with Skin for Life innovative professional skin care products.
3. Anhydrous Formulation - Our cosmetic acid peel is activated by water, it will peak the skin for 3 - 5 minutes and slowly neutralize. Our formulation goals are to make sure all skin types, conditions, and colors have a safe and effective skin experience.
4. SMARTPeptides - Our specialty certified organic laboratory sees a bright skin care future. Using immunity peptides and amino acids in our lipid arm bio emulsion delivery makes the skin response more intensified and less traumatized, with Skin for Life you will achieve healthy long term skin results.
5. Your best cosmetic acid peel is your best controlled peel. You may rest at ease by watching our new professional peel video to learn application and ingredient information. Visit YouTube: <https://www.youtube.com/watch?v=b9WmJ2uf09A>.

Pro Peel Prep

+ active brighteners w/ LSS™ delivery

Pro peel prep is an excellent lactic acid cosmetic exfoliation for all skin types, conditions, and colors. This may be used as your first initial application when working with sensitive, sun damaged, oily / troubled, or darker skins.

You may use this in conjunction with microdermabrasion, oxygen infusion, ultra scrubber, dermaplaning, and as your peel prep before your other cosmetic acid peel applications.

Kojic Acid
Lactic Acid
Bearberry Extract
Licorice Root Extract

*Improve skin with
long term results
without using
sun sensitive ingredients.*

Professional Peel

PROFESSIONAL PEEL SYSTEM - PREPARATION

You may use our peels up to a Fitzpatrick IV or V - depending on the skin condition.

It is recommended that the skin be prepped with home care products for at least 2 - 4 weeks.

******Remember*** the darker the skin the longer the home care preparation.***

Home Care Prep system would be one of the following:

Renewal Serum 10% lactic concentrate + LSS delivery - (2 - 4 weeks) - PM Only

Stop using this product 3 days prior to the professional peel treatment.

May use a moisturizer over the serum for extra moisture benefits.

Vita A Regenerate + .15% retinol - (2 - 4 weeks) - PM Only

Stop using this product 3 days prior to the professional peel treatment.

May use a moisturizer over the serum for extra moisture benefits.

For hard pigment areas (melasma - hyperpigmentation) or acne scarring - may use both products together on a nightly basis - Renewal Serum is 1st and then apply Vita A Regenerate 2nd over top. Follow with moisturizer for extra moisture benefits. PM Only - Stop 3 - 5 days prior to the Professional Peel treatment.

PROFESSIONAL PEEL SYSTEM PROTOCOL

CLEANSE – Select appropriate cleanser for skin type and condition.

TONE – **Instant Soothing Toner natural actives** – making sure skin is completely clean from residue. Dry Skin.

PRO RADIANCE PEEL active brighteners + LSS™ delivery – Saturate 2 x 2 gauze. Apply an even application to face. **Do Not Remove.**

- You may overlap strokes to make sure everything is complete.
- Wait at least one minute or until product is absorbed, before completing the remaining facial steps.

PROFESSIONAL PEEL salicylic, lactic, citric – pour approximately 20ml into a glass bowl and saturate a 2 x 2 gauze and apply to one area at a time.

*It is **not** recommended to apply over the entire face at a time.

- o You may use at the most 3 strokes of application to an area, once applied to an area (wait 30 – 60 seconds).
- o Saturate a 4 x 4 gauze with cold ice water to activate the professional peel. Continue to use the moistened cold gauze until all sensation is no longer evident to the administered area.
- o Proceed with another area and continue the above steps until the entire face is completed and your client/patient skin is neutralized there is no sensitivity to the area.

INSTANT SOOTHING TONER natural actives – spray 3 – 5 times and dry to desensitize the skin.

VITA C PEPTIDE SERUM + LSS delivery – apply and blend well.

VITAL RECOVERY CONCENTRATE natural botanicals + LSS delivery – apply and blend well.

SOL DEFENSE SPF 30 BROAD SPECTRUM PHYSICAL SUNSCREEN – apply and blend well.

PROFESSIONAL PEEL SYSTEM PROTOCOL

*****Additional Notes*****

You may use the Oxygen Infusion System after the Professional Peel System.

– recommend using Oxygen Infusion phase 1 brightening + LSS delivery or Oxygen Infusion Gel phase 1 sensitive + LSS delivery along with your Oxygen Infusion phase 2 activator - for activation of pure oxygen.

Then proceed with Instant Soothing Toner and the rest of the Skin for Life professional skin care products as your completed treatment.

You may also use a cool calming mask after your Vital Recovery Concentrate natural botanicals + LSS delivery step above, and you would then repeat the steps of Vita C Peptide Serum, Vital Recovery Concentrate, and finish with SOL defense SPF 30.

Mask Recommendation –

Skin for Life Algae Mask + Algae Liquid Booster for all skin types to cool and calm the skin after the Professional Peel System Treatment.
