skin for life

Brand Statement

To be the most passionate about delivering quality, superior customer service, performance driven formulas/ingredients that are safe, effective, and result oriented.

Our commitment is to stay loyal to professional skin and spa therapists without selling directly to consumers. This is our brand choice.

Our mission is to continue to build state of the art equipment and research the best ingredients to maintain high standards in professional skin care products.

Our bio-science technology sets us apart from other commercial brands. We want to continue to build loyal clientele through the professional esthetic network.

Marketing Strategy

Simplicity, elegance, and straightforward message that centers around the professional esthetic industry.

Empower social media channels and maintain our skin for life website with positive, educational, and informative content so professional therapists may develop, increase, and exceed business goals.
Operational Safety Instructions -
• Read all instructions before use to avoid injury.
• To avoid serious injury or death, follow safety information in this document.
• Keep this manual for reference.
• Read all product safety labels.
• Refer to local building codes for installation requirements.
• Always turn off machine when not in use.

Safety Information -
All Electrical Devices for Prevention of Electrical Shock Exposure:
• Keep machine unplugged when setting up machine to prevent accidental injury.
• Make sure machine is on a clean and dry surface area to prevent any accidental injury.
• Prohibit water from seeping into the machine housing.
• Avoid any water and/or liquids around the vicinity of the machine when in use or not in use to prevent any accidental injury.
• Check the cord and plug for damage before use.
• Pay attention to safety labels on machine before plugging the cord into an outlet.
• Switch on the equipment only after plugging into an outlet. Always turn off the machine before unplugging the cord from the outlet.
• Allow sufficient space for ventilation to prevent overheating.
• Avoid placing the cord near any hot objects.
Using Ultra Sonic Waves brought a heightened awareness when working with professional skin care formulas.

The cavitation responses gave way to decreasing the thickness of the stratum corneum, where professional treatment formulas have a greater chance of interacting with the skin. Professionals are able to interact rapidly and proficiently by delivering vital nutrients to skin. Ultra sonic waves through cavitation help to lift, hydrate, and protect the skin's surface.

Ultra scrubber lifts by exfoliating the surface of the skin and ultra sonic wave attachments enhance product penetration to support skin health. Ultra scrubber is fantastic for lifting dead skin cells without the friction or abrasion that may cause sensitivities to various skin conditions. Perfect for sun damaged skin as well as various pigmentation that are associated with sun.

Ultra scrubber is also excellent for oily and troubled skin conditions. You may perform ultra scrubber on mild, moderate, to severe oily and blemished skins.

Ultra sonic waves are designed to increase the depths of product penetration. It allows skin professionals to indirectly affect deeper layers to encourage a healthier skin function. Mature skins, i.e. wrinkles and fine lines benefit from Ultra Sonic Wave equipment. The treatment builds volume - fullness for a beautiful youthful complexion.

Ultra Sonic Waves are excellent in conjunction with microdermabrasion, cosmetic acid exfoliation, microcurrent, oxygen infusion systems, and many more combinations for your clientèle's long-term results.
ULTRA SCRUBBER & ULTRA SONIC WAVE SYSTEM

Precautions:
Do NOT use ultra scrubber or ultra sonic hand pieces too close to the eyes
Do NOT perform on the anterior of the throat
Chronic wounds - may need to be addressed by a dermatologist
Do NOT use on damaged or at-risk skin.
Regenerating nerves may be uncomfortable from certain cosmetic procedures. Ask for a “Physician Consent” if necessary

Contraindications:
• Heart Disease
• Pregnancy
• Pace Maker
• Epilepsy
• Cancer
• Herpes Zoster Virus (Shingles)
• Herpes Simplex Virus (Cold Sores and/or Fever Blisters)
ULTRA SCRUBBER INSTRUCTIONS

ULTRA SCRUBBER - Insert the scrubber blade “plug” into the scrubber output portal located on front side of the machine (See Diagram).

TIME - 20 minutes default setting - maximum 60 minutes.

INDIVIDUAL INTENSITY -
I - LOW FREQUENCY - Normal skin, sensitive/allergic skin, back, shoulders, hand, feet
II - MEDIUM FREQUENCY - Normal skin, dry skin, mature skin, sun damaged skin, oily skin, blemished skin, clogged pores, back, shoulders, hands, feet
III - HIGH FREQUENCY - Thickened skin, dry skin, mature skin, sun damaged skin, oily skin, blemished skin, clogged pores, back, shoulders, hands, feet.

MODE - Machine Intensity (C, 75%, 50%)
C (Constant) Normal skin, dry skin, mature skin, sun damaged skin, oily skin, blemished skin, clogged pores (open/closed comedones), milia cysts, back, shoulders, hands, feet.
75% Normal skin, oily skin, blemished skin, clogged pores (open/closed comedones), resistive skin, thickened skin, back, shoulders, hands, feet.
50% Normal skin, sensitive/allergic skin, dry skin, mature skin, sun damaged, sensitive/oily/blemished skin, back, shoulders, hands, feet.

Ultrascrubber output portal  1MHz Ultrasonic output portal

2MHz Ultrasonic output portal
Ultra Scrubber Blade - Use the suggested settings referenced on page 7.

The purpose of using the Ultra Scrubber is to lift dead skin cells from the stratum corneum so your client may receive performance results.

Please use the diagram above to assist you with the proper directional techniques. Use upward strokes with outward movements as indicated above.

*Important Notes* - When performing with Ultra Scrubber Hand Piece, please keep continuous movements, DO NOT stop and rest the hand piece on the skin. Your movements must be on going.

Be careful of pressure when pressing down with ultra scrubber hand piece. Glide the ultra scrubber hand piece gently without firm pressure.

Skin Must Be Moist so the cavitation may work to remove dead skin cells proficiently. Our Skin for Life Enzyme Exfoliate + papaya complex is strongly recommended to be used in conjunction with the ultra scrubber hand piece.
ULTRA SONIC WAVE INSTRUCTIONS

FLAT ULTRA SONIC HAND PIECE - 1 MHz HAND PIECE
This hand piece has a turn lock plug in. Once you insert the black plug into the silver output portal you must turn to the right to lock the plug into the output portal. (See Diagram)
The flat hand piece is for flat areas of the face where you may perform more lifting and firming movements to increase skin volume and fullness. See Diagram for Panel display.

Improve Facial Contouring, Wrinkles, and Fine Lines

**MODE -**

**C - CONSTANT FREQUENCY** - Duration of performance application - 10 minutes of constant frequency.

**PULSE** - intermittent frequency for deeper waves. Duration of performance application - 5-10 minutes

Variation of Pigmentation

**MODE -**

**C - CONSTANT FREQUENCY** - Duration of performance application - 10-15 minutes of constant frequency.

**PULSE** - intermittent frequency for deeper waves. Duration of performance application 5-10 minutes

Sensitive Skins - Temporary or Chronic Sensitivity

**MODE -**

**PULSE** - intermittent frequency for deeper waves. Duration of performance application - 5-8 minutes of pulse.

**INTENSITY:** GREEN - Low Intensity (Sensitive Skins)

**ORANGE** - Medium Intensity

**RED** - High Intensity for targeted areas only (1 Pass Only)
CONE SHAPED ULTRA SONIC HAND PIECE - 2 MHz HAND PIECE

Like the flat hand piece you must insert the plug in and turn to the right to lock into place before starting your treatment. (See Diagram)
This hand piece is a specialty hand piece that is used for the surrounding eye area or for more targeted areas of the face, i.e. around lip line because of fine lines or wrinkles. See diagram for Panel display.

Eye Care

MODE -

C - CONSTANT FREQUENCY -
Duration of performance application maximum
10 minutes of constant frequency. (Up to 5 minutes each eye)
INTENSITY - GREEN ONLY
ULTRA SONIC APPLICATION TECHNIQUES

Ultra Sonic Flat Hand Piece 1 MHz -
Using circular lifting movements, follow the diagram to apply movement techniques.
Use the 1 MHz flat hand piece for flat areas of the face.

Ultra Sonic Cone Shaped Hand Piece 2 MHz -
Use for the surrounding eye area and target areas around the lip line.
The purpose of the Flat 1 MHz hand piece and the Cone Shaped 2 MHz hand piece is to increase volume - fullness within the layers of the epidermis.
Maximum amount of treatment time 15 minutes, the minimum is 8 minutes - both being dependent on the skin's sensitivities. Please refer to the application instructions.
BASIC SKIN PROTOCOL

CLEANSER - Cleanse using the appropriate cleanser - DO NOT add water to cleansers.
GENTLE MILK CLEANSER - Dry, Mature, chapped - all skin types
GENTLE GEL CLEANSER - sensitive skins, oily sensitive skins, reactive skins.
SALICYLIC GEL CLEANSER - oily troubled, and blemished skins.

TONE - Instant Soothing Toner + natural actives - spray 3 - 5 times over the entire face, neck, and chest area. Then remove residue with moistened sponges and/or gauze. Dry skin completely.

ENZYME EXFOLIATE + PAPAYA COMPLEX WITH LSS™ DELIVERY - apply an even medium - thick application with a facial mask brush. You may use moistened finger tips to massage for 3-5 minutes. Periodically maintain moistened finger tips to assure the skin is interacting with the papaya enzyme and stays moist prior to “Ultra Scrubber”.

ULTRA SCRUBBER HAND PIECE - with continuous movements use the application techniques. Be mindful of pressure. Let the blade do all the work. No need to push down to apply pressure. Touch the skin and glide the ultra scrubber blade gently over the Enzyme Exfoliate + papaya complex in the recommended procedural directions.

Once application is completed, remove with a room temperature moistened towel, sponges, and/or gauze thoroughly.

TONE - Instant Soothing Toner + natural actives - spray skin 3-5 times over treated areas and remove with moistened sponges or gauze.

* PLEASE REFER TO OXYGEN INFUSION PROTOCOLS AT THIS POINT IF APPLICABLE.*

Active + Restore -
Vita C Peptide Serum + LSS™ delivery - Apply 1-2 pumps to face, neck, and chest. Massage until absorbed.
Moisture Booster hyaluronic acid + LSS™ delivery - Apply 1 pump to face, neck, and chest. Massage until absorbed. Skin for Life Serums are used for skin repair and support.
BASIC SKIN PROTOCOL

Nourish + Protect -
Vital Recovery Concentrate natural botanicals + LSS™ delivery - for all skin types - apply 1-2 pumps to face, neck, and chest. Massage for 30 seconds - 1 minute.
Ultra Performing Complex A,C,E complex + LSS™ delivery

Antibac Essentials+ lysozyme protection with LSSTM delivery - Important for oily, troubled, blemished skin conditions.
Ultra Performing Complex+ vitamins A, C, E with LSS™ delivery - If you have mature, slack-ing, or sun damaged skin this will offer the right amount of daily nutrients to give a more resilient youthful appearance.
Moisture Complex nourishing peptides + LSS delivery - Astounding combination of growth peptides and moisture concentration ingredients. Use as a moisturizer or mix equal parts with your favorite moisturizer for more water concentration for unbalanced skin.

You may use 1 or more of the above selection to massage or as an active dual system for performance results with the Ultra Sonic Hand Piece.
Massage - Once completed.
Ultra Sonic Wave Hand Pieces -
Conductivity Gel - Apply a medium - thick layer of conductivity gel on the entire face. You may apply extra moisture by using a face mask brush and water.

1 MHz - Flat Head Ultra Sonic Hand Piece -
Please refer to the directional procedures for the Flat Head Ultra Sonic Hand Piece on page 12. Your movements should be in circular upward movements for firming and lifting movements.

2MHz - Cone Head Ultra Sonic Hand Piece -
Please refer to the directional procedures for the Cone Head Ultra Sonic Hand Piece. Your moves should be smooth, and outward movements. Please note do not perform movements directly under the eyes.

Review the procedural time per skin type and condition. Maximum time is 10 minutes - Minimum time 5 minutes. See page 10 for details.
Once you have completed your skin treatment, you may remove with a warm towel (NOT hot).

Instant Soothing Toner+ natural actives - spray 3-5 times over the treated areas and remove with moistened sponges and/or gauze.
Calm + Repair (Select one of the following)

1) CryoAlgae Mask + CryoAlgae Booster
2) Anti Pollution Mask
Follow Instructions listed on each packet, applying mask quickly to the skin with a spatula. Start with the forehead and transition until the face is complete with a medium-thick application. If you wish to apply to the neck and decollete, please use additional sachets.

3) Revitalizing Mint Mask purifying camphor + LSS delivery
Apply an even application to cleansed face avoiding direct contact with eyes leave on for 5 minutes and rinse well with warm water.

Tone -
Instant Soothing Toner + natural actives - Spray 3 - 5 times over the treated areas and remove with moistened sponges and/or gauze.

Active + Restore -
Moisture Booster+ hyaluronic acid with LSSTM delivery - perfect for all skin types.

Nourish + Protect - mix equal parts of:
Vital Recovery Concentrate+ natural botanicals with LSS™ delivery - perfect for all skin types and conditions.
Moisture Complex nourishing peptides + LSS delivery -Astounding combination of growth peptides and moisture concentration ingredients.

SOL defense SPF 30 Broad Spectrum Sunscreen UVA UVB - Physical Protection with a flawless even finish.
How Does Oxygen Infusion Work?

This infusion system has an oxygen motor and pump to dispense 21 % oxygen onto the skin. After prepping the skin, to begin the treatment you will need to use one of the four Oxygen Infusion serums phase 1. Apply with a facial mask brush for a medium thick application. Once you have completed your application you may use your performance massage movements for 1 - 2 minutes. Next, fill your airbrush gun cup halfway with Oxygen Infusion phase 2 + activator. Apply the nozzle of the airbrush close to the skin, where the airbrush nozzle is almost touching the skin. Use small circular movements with your airbrush gun and then use the other hand to manipulate the Oxygen Infusion phase 2 + activator until you see a white lather on the skin. This will signify interaction between the Oxygen Infusion phase 2 + activator and the stratum corneum to assist the skin's natural process of breaking down our formulation into your skin's pure oxygen. You may perform 2-3 additional passes to complete the application. Once you complete your passes, use your performance massage movements for 1-2 minutes and then remove with a warm towel and continue with your skin therapy steps.

How Many Treatments are Needed?

You may add Skin for Life Oxygen Infusion Therapy to your clients/patients monthly facial treatment.
You may see your client/patient twice a week for 3 weeks to meet their skin goals, (pigmentation, sensitivity, oily/troubled skin, or mature/aging skin).
You may see your client/patient every two weeks to maintain and sustain their skin goals.

Who Benefits?

Every skin type, condition, and color benefits from Skin for Life Oxygen Infusion therapies. Our formulations are performance driven, providing healthy long lasting results for a youthful appearance.
Skin Awareness + Contraindications

- Pregnancy/Breast Feeding
- Accutane - Should be minimum of 8 months - when in doubt consult physician for approval.
- Do Not combine with TCA, Jessner, or Sacylic Acid Peels
- Sunburn
- Rosacea Advanced Stages - III
- Cancer/Skin Cancers/Open Lesions

Precautions

- Alpha Hydroxy (Glycolic, Mandelic, Azelaic, Lactic, Citric) skin must be free of all sensitivities before applying Skin for Life oxygen infusion therapy.
- Retinoid (Retin A, Tazorac, Differin, and any other vitamin A derivative) Have client/patient discontinue for 3 days before performing an oxygen infusion therapy.
- Skin sensitivity
- Contacts - Please have client/patient remove contacts before oxygen procedure.
- Under the care of a physician - general for all procedures administered.
Oily / Troubled Skin Protocol

1. Cleanse: Salicylic Gel Cleanser + clarifying solution - put (1) teaspoon of Salicylic Gel Cleanser in a glass bowl and whip to a creamy lather and apply to face and neck. Manipulate with gentle massage movements and remove with a warm towel.

2. Tone: Use Salicylic Toner + eucalyptus oil - apply to the entire face and neck.

3. Exfoliation, may use the following:
   a. Microdermabrasion (Non-inflamed skin only)
   b. Enzyme Exfoliate + papaya complex
   c. Dermaplaning (Non-inflamed skin only)
   d. Alpha Hydroxy Acids (however make sure there are NO sensitivities before applying Skin for Life oxygen products).
   e. Ultra Scrubber - cavitations

4. Oxygen Infusion Gel phase 1 + antibacterial with LSS™ delivery - Apply a medium thickness with a facial mask brush to the entire face and neck. You may concentrate on localized areas of concern. Manipulate for 1-2 minutes with performance massage movements.

5. Oxygen Infusion phase 2 + activator - Fill the cup of your airbrush gun halfway and spray onto the skin in circular movements. The tip of the airbrush gun should be very close to the skin for liquid concentration. You may manipulate with the other hand as you spray the oxygen infusion for phase 2 + activator. You may perform 2-3 passes to complete the process. Once completed, use performance massage movements for 1-2 minutes and then remove with warm towel.

6. LED Light Therapy, may use the following: (Optional)
   a. RED L.E.D. Light Hand Piece - Apply to the skin for 90 seconds and transition with a 30% - 50% overlap by placing the hand piece to another area, again by holding to the area for 90 seconds. Perform 4-5 passes before using the BLUE L.E.D. Light hand piece.
   b. For non-inflamed and/or inflamed troubled skin, you may use BLUE L.E.D. Light hand piece. Repeat the same movements from your RED L.E.D. Light application.

7. Active + Restore -
   a. Apply Moisture Booster + hyaluronic acid with LSS™ delivery and Vita C Peptide Serum with LSS™ delivery.

8. Nourish + Protect -

9. Physical Protection -
   a. SOL defense SPF 30 Broad Spectrum Physical Sunscreen

You may also apply “Revitalizing Mint Mask” after Nourish + Protect to cool, calm, and refresh the skin, wait 5 minutes. Remove the mask and repeat by finishing with serum, moisturizer, and sunscreen.
Mature Skin Protocol

1) Cleanse: Gentle Milk Cleanser+ vitamins A & E - Apply a generous amount to the face, neck, and chest and massage to emulsify debris and other daily pollutants. Do Not use water with the cleanser, it works best alone when binding with the skin.

2) Tone: Instant Soothing Toner+ natural actives - Spray over the entire face and neck, and then you may use moisten gauze, sponge, and/or a warm towel to remove residue. This prepares the skin for the next application.

3) Exfoliation: You may use one or two of the following:
   a. Microdermabrasion
   b. Ultra Scrubber
   c. Alpha Hydroxy (Lactic, Glycolic, Mandelacic, Citric ... ) Make sure the skin has NO sensitivities before applying Oxygen Infusion Gels.
   d. Dermaplaning
   e. Enzyme Exfoliate + papaya complex

4) Oxygen Infusion Gel phase 1 + A, C, E complex with LSS™ delivery - Apply a medium thickness with a facial mask brush to the entire face and neck. Manipulate for 1-2 minutes with performance massage movements. Do Not Remove.

5) Oxygen Infusion phase 2 + activator - Fill the cup of your airbrush gun halfway, and spray onto the skin in circular movements. The tip of the airbrush gun should be very close to the skin for liquid concentration. You may manipulate with the other hand as you spray the oxygen infusion phase 2 + activator. You may perform 2-3 passes to complete the process. Once completed use performance massage movements for 1-2 minutes and then remove with warm towel.

6) LED Light Therapy, may use the following: (Optional)
   a. RED L.E.D. Light Hand Piece - Apply to the skin for 90 seconds and transition with a 30% - 50% overlap by placing the hand piece to another area, again by holding to the area for 90 seconds. The complete application time is 12 - 15 minutes for significant results.

7) Active+ Restore: Vita C Peptide Serum with LSS™ delivery and Moisture Booster+ hyaluronic acid with LSS™ delivery. Apply (1) pump and blend well.

9) Massage with lifting + firming movements. This is a great time to perform Nue Fusion Microcurrent, to lift, firm, and tighten the skin and encourage muscle stimulation. Follow the microcurrent protocol at this point.

10) Revitalizing Mint Mask: Apply an even application to cleansed face avoiding direct contact with eyes. Leave on for 5 minutes and rinse with luke warm water.

11) Apply Vita C Peptide Serum with LSS™ delivery, Moisture Booster+ hyaluronic acid with LSS™ delivery, Ultra Performing Complex+ A, C, E complex with LSS™ delivery, and SOL defense SPF 30 Broad Spectrum physical sunscreen as your complete skin protection.
Brightening and Lifting Protocol

1) Cleanse: Gentle Milk Cleanser+ vitamins A & E - Apply a generous amount to the entire face, neck, and chest, and manipulate in circular movements. Do Not add water, let the cleanser bind with the skin to emulsify debris and daily pollutants.

2) Tone: Instant Soothing Toner+ natural actives - Spray over the entire face and neck, and then you may use moisten gauze, sponge, and or towel to remove residue. This prepares the skin for the next application.

3) Exfoliation: You may use one or two of the following:
   a. Microdermabrasion
   b. Ultra Scrubber
   c. Alpha Hydroxy (Lactic, Glycolic, Mandellic, Citric ...) Make sure the skin has NO-sensitivities before applying Oxygen Infusion Gels.
   d. Dermaplaning
   e. Enzyme Exfoliate + papaya complex

4) Oxygen Infusion Gel phase 1 + brightening with LSS™ delivery - Apply a medium thickness with a facial mask brush to the entire face and neck. Manipulate for 1-2 minutes with performance massage movements. Do Not Remove.

5) Oxygen Infusion phase 2 + activator - Fill the cup of your airbrush gun halfway, and spray onto the skin in circular movements. The tip of the airbrush gun should be very close to the skin for liquid concentration. You may manipulate with the other hand as you spray the oxygen infusion phase 2 + activator. You may perform 2-3 passes to complete the process. Once completed use performance massage movements for 1-2 minutes and then remove with warm towel.

6) LED Light Therapy, may use the following: (Optional)
   a. RED L.E.D. Light Hand Piece - Apply to the skin for 90 seconds and transition with a 30% - 50% overlap by placing the hand piece to another area, again by holding to the area for 90 seconds. You may perform the application for 4 - 5 cycles over the entire face. The complete application time is 12 - 15 minutes for significant results.

7) Active+ Restore: Vita C Peptide Serum with LSS™ delivery and Moisture Booster+ hyaluronic acid with LSS™ delivery. Apply (1) pump and blend well.

9) Massage with lifting + firming movements. This is a great time to perform Nue Fusion Microcurrent, to lift, firm, and tighten the skin and encourage muscle stimulation. Follow the microcurrent protocol at this point.

10) Revitalizing Mint Mask: Apply an even application to cleansed face avoiding direct contact with eyes. Leave on for 5 minutes and rinse with luke warm water.

11) Apply Vita C Peptide Serum with LSS™ delivery, Moisture Booster+ hyaluronic acid with LSS™ delivery, Ultra Performing Complex+ A, C, E complex with LSS™ delivery, and SOL defense SPF 30 Broad Spectrum physcial sunscreen for your complete skin protection.
Professional Treatment Cost

Oxygen Infusion Gel phase 1 - Approximation from using 7ml - $1.93 per treatment
Oxygen Infusion phase 2 + activator - Approximation from using 5ml - $1.38 each
Total Treatment Cost: $3.31 per treatment

Menu Pricing

30 minute - Oxygen Infusion Signature Treatment $65.00
- Your Profit - $61.69 equates to $2.06 per minute.

1 hour - Oxygen Infusion Signature Treatment $95.00
- Your Profit - $91.69 equates to $3.06 per minute

Add-on Service $35.00
- Your Profit - $31.69 equates to a 5 minute add on to a skin therapy service - $6.34 per minute.

Replacement Cost

Oxygen Infusion Gel phase 1
(A, C, E complex, brightening, antibacterial, sensitive) $33.00

Oxygen Infusion phase 2 + activator $45.00

Oxygen Airbrush Accessory - Silver with Cap $95.00

O2 Cleaner - 1oz $5.00

O2 Cleaner - 16oz $34.99

I understand the information I have given is to aid the skin therapist and is not a substitute for medical care. I understand these questions and have answered them honestly and accurately.

Signed By Client __________________________ Date __________________________
• Do not wear contact lenses during treatment sessions - they may be placed back in after treatment.
• Do not use glycolic, AHA's, or any retinol products 48 hours before or after treatment.
• You must not be currently taking Accutane. No Accutane use for at least 8 months to 1 year.
• No suntan beds for 2 weeks post treatment (recommend self tanners for a healthy lifestyle change).
• Physical sunscreen of at least SPF 30 to be applied and re applied during sun exposure.

Initials Required

_______ I have been thoroughly informed by professional therapist _______ of any complications to recommended procedure __________________________ and I understand there are no guarantees to procedures given by _______.

_______ I am committed to following post treatment care given to me by professional therapist _______ to ensure the best possible result.

_______ I have given all medical information to the best of my knowledge to _______ to prevent any contra indications to procedures.

Yes or No - I have had a history of cold sores, fever blisters, and/or shingles.
Yes or No - I am using (Retin A, Tretinoic Acid, Differin, Glycolic Acid, Accutane, or other vitamin A derivative topical creams and/or ointments.

_______ I have not used any performance agents within the last 5 - 7 days, knowing that this is a contra indicator for having procedures performed.

_______ I am committed to avoiding the sun and/or tanning facilities for the recommended time suggested by professional therapist _______.

LED Light Summary

LED technology was originally developed to enhance the growth of plant tissue in space by NASA's Marshall Space Flight Center and Quantum Devices, Inc. of Barneveld, Wisconsin. LED’s have a similar physiological effect on human cells as they do on plant cells. It is a natural photo – biochemical reaction that is similar to photosynthesis in plants, which triggers the body to convert light energy into cell energy.

Age defying - 680nm
(RED)

Oily/Troubled Skin - 460nm
(BLUE)

Skin Rebuilding - 800nm
(Infrared)

This remarkable technology, enhances the ATP (Adenosine Tri phosphate) within the mitochondria of the cells which excites the first process of cell division. This non thermal response relies on the visible light spectrum to interact with cells for a growth response.

RED LED Light is designed to trigger the first initial ATP response. RED LED Light should always be the first light used on all skin types, conditions, and colors. Skin Indications - sun damaged skin, mature, pigmented lesions, oily, troubled skin, capillary distention, and temporary/chronic sensitive skins. How To Use - RED LED Light hand piece - use 90 seconds per area, with overlapping 30% - 50% completing the process within 12 - 15 minutes before transitioning to another LED Light color.

BLUE LED Light is suggested for oily and troubled skin conditions. The depth of this light is important to minimize the activity of bacteria within the sebaceous gland that is associated with blemished skins. Skin Indications - oily, troubled skin, blemished skin, and seborrhea skins. How To Use - BLUE LED Light hand piece - use for 90 seconds per area with overlapping 30% - 50% completing the process in 10 minutes.
The purpose of the LED Light Therapy study from NASA was to discover the properties of wound healing. Increasing cellular growth encourages cell division which provides skin with a youthful healthy appearance. LED Light Therapy also assists with minimizing overactive oily and/or troubled skin conditions.

L.E.D Light Therapy Contraindications:
• Epilepsy
• Pregnancy (or if you are trying to become pregnant)
• Do Not Apply to an Open Wound
• Thyroid Conditions

Precautions to Consider:
• Sensitivity to Migraines/Headaches
• Topical or Synthetic Steroids (NSAID’s)
• Do Not Use heavy creams and/or ointments

LED Light Therapy treatments have been explained to me and any questions I have regarding LED Light Therapy treatments have been answered. I understand there are certain contraindications that preclude someone from receiving LED Light Therapy treatments and these include epilepsy, pregnancy, thyroid conditions, medications, causing light sensitivity and open wounds. I also understand there are other precautions that should be considered before receiving LED Light treatments and may require a doctor’s release and/or I assume any risk involved. These include but are not limited to a person receiving cortisone and/or steroids injections, and a person prone to light sensitive migraines. Although LED Light Therapy is a non-invasive treatment and the precautions and contraindications have been explained to me, I understand that certain risks or complications can occur from both known and unknown causes, and I freely assume these risks.

I acknowledge that no guarantee has been given to me as to the condition of the complexion, skin pore size, fine lines, and wrinkles as results will vary per client/patient. I am aware that follow up treatments may be necessary to achieve optimal results with gradual results occurring over time.

Warranty Guidelines

Warranty Agreement ~

Skin for Life warrants this product to be free of defects in material and workmanship for a period of **two years** from the date of original purchase. *(Initial User Only - non transferable).*

Responsibility of Original Purchaser ~

1. Retain Sales Receipt
2. Keep Packaging (Box and Packing Material) for at least 2 years
3. If machine requires off site service, contact Skin for Life authorized warranty service and technical center (866) 312.SKIN (7546).
4. **If equipment is brought back to Skin for Life under warranty and it is determined that lack of maintenance is the reason why equipment is compromised, customer will incur freight and repair costs.**

Training Support:

Equipment Training is mandatory to avoid improper use of equipment and to avoid compromising your warranty. Call Skin for Life at 866-312-7546 to schedule your initial training which may take place onsite or by web conference.

Note*** Maintenance is enforced along with proper training so you may maintain an excellent working machine. Without proper maintenance and training you could possibly VOID your warranty.
Warranty Guidelines

This warranty does not cover:
1. Merchandise sold as demo units, reconditioned, floor models and/or display models.

2. Merchandise used as “Rental” equipment.

3. Merchandise that has become inoperative because of misuse, improper and/or unauthorized repair or alterations; or failure to operate product in accordance with the instructions provided in the “General Operating Manual” and reiterated in the “Mandatory” training received onsite or by webinar.

4. Repair and transportation costs if equipment is determined not to be defective.

5. Any incidental, indirect, or consequential loss, damage or expense that may result from any defect, failure or malfunction of the products.

Skin for Life Return Policy

• All returns and/or credits are subject to approval by Skin for Life and MUST be made within 30 days of the original sale.

• If merchandise is returned after 30 days or without proper authorization then it is Skin for Life’s prerogative to charge a 25% restocking fee.

• Customers incur all “Shipping Costs” for the return of equipment, supplies, and/or skin care to Skin for Life.

• Everything must be returned in original “New” condition.

• Skin for Life only accepts unopened and untampered skin care product as a return. A 25% restocking fee may be applied.

• All accessories must be returned with equipment.

• Once received, Skin for Life will evaluate the equipment and accessories. Once confirmed, credit will be issued to customer. Credit Memo will be emailed to customer for confirmation of the refunded funds.
Ultrascrubber + Ultrasonic Wave System
Customer Satisfaction Survey
