

BRIGHTENING SKIN CARE KIT

OVERALL BENEFITS

- Helps reduce the appearance of hyperpigmentation, sun damage, and uneven skin tone.
- Strengthens the skin barrier to support long-term correction and prevent future discoloration.
- Improves clarity and luminosity while enhancing overall tone uniformity.
- Promotes smoother, more even-textured skin.

SKIN TYPES

- **Hyperpigmented Skin**
Uneven tone caused by sun damaged, hormonal changes, or inflammation: requires corrective brightening support.
- **Aging / Mature Skin with Discoloration**
Combined concerns of pigmentation and loss of vitality; requires brightening and skin strengthening support.
- **Sun Damaged Skin**
UV-induced discoloration and uneven tone; benefits from antioxidant and corrective care.
- **Post-Inflammatory Hyperpigmentation (PIH)**
Dark spots following acen or irritation; requires gentle, consistent correction.

FITZPATRICK SKIN COMPATIBILITY

Suitable for Fitzpatrick I–VI. Formulated to support safe, progressive brightening while minimizing the risk of irritation and post-inflammatory hyperpigmentation.

GENTLE GEL CLEANSER

Apply a generous amount to dry skin. Massage for 1 minute. Wet hands and fingertips. Massage for another minute. Rinse with lukewarm water. Pat dry skin with a soft towel.

INSTANT SOOTHING TONER

Saturate a cotton pad with Instant Soothing Toner. Apply to face and neck. Use fingertips to lightly massage into the skin until absorbed.

VITA C SERUM

Apply 1 or 2 pumps to face, neck, and around the delicate eye area as an intensive eye serum. Blend well.

ULTRA PERFORMING COMPLEX

Apply 1 or 2 pumps to face, neck, and around the delicate eye area as a hydrating eye cream. Blend well.

RETINOL LEVEL 2

Apply as a nighttime serum only. Use twice a week with at least 48 hours in between applications. Always apply Ultra Performing Complex over the serum to provide additional hydration and lipid skin support. Avoid direct contact with eyes.

DAY TIME PHYSICAL MINERAL SUNSCREEN

May apply SOL Defense SPF 30 physical mineral sunscreen after moisture complex to protect the skin during the day.

STEP-BY-STEP INSTRUCTIONS

PROFESSIONAL NOTES:

Ideal for clients experiencing hyperpigmentation, uneven skin tone, sun damage, and post-inflammatory discoloration (PIH).

Supports progressive brightening by helping regulate melanin activity without compromising the skin barrier.

Suitable for integration into corrective treatment plans and maintenance between professional services.

Consistent use is the key, visible improvement in tone and clarity typically occurs within the first 4 weeks.
