

DRY SKIN CARE KIT

OVERALL BENEFITS

- Ideal for clients experiencing transepidermal water loss (TEWL) and barrier impairment.
- Safe for use post-treatment (when skin is intact) to restore hydration and comfort
- Excellent for seasonal transitions, especially fall and winter months.
- Can be integrated into both corrective and maintenance treatment plans.

SKIN TYPES

- **Dry Skin**
Lipid-deficient, lacking natural oils; requires intensive hydration.
- **Sensitive Skin**
Compromised barrier; prone to redness, irritation, and reactivity - requires calming, non aggressive.
- **Aging / Mature Skin**
Decreased oil production and slower cell turnover; benefits from hydration and lipid replenishment.
- **Combination Skin (Dry-Dehydrated Areas)**
Oil imbalanced with localized dryness; requires targeted hydration without oil zones overload.

FITZPATRICK SKIN COMPATIBILITY

Suitable for Fitzpatrick I-VI
Formulated to support hydration and barrier repair without increasing sensitivity or risk of post-inflammatory response.

GENTLE MILK CLEANSER

Apply a generous amount to dry skin. Massage for 1 minute. Wet hands and fingertips. Massage for another minute. Rinse with lukewarm water. Pat dry skin with a soft towel.

INSTANT SOOTHING TONER

Saturate a cotton pad with Instant Soothing Toner. Apply to face and neck. Use fingertips to lightly massage into the skin until absorbed.

MOISTURE BOOSTER

Apply 1 or 2 pumps to face, neck, and may use around the delicate eye area as an intensive eye serum. Blend well.

ULTRA PERFORMING COMPLEX

Apply 1 or 2 pumps to face, neck, and may use around the delicate eye area as an vitamin enriched eye cream. Blend well.

MOISTURE COMPLEX

Begin with a small amount. Apply to the face, neck, and may use as an eye and lip balm to protect against dryness due to lack of hydration. Blend well.

DAY TIME PHYSICAL MINERAL SUNSCREEN

May apply SOL Defense SPF 30 physical mineral sunscreen after moisture complex to protect the skin during the day.

STEP-BY-STEP INSTRUCTIONS
