

PROFESSIONAL RADIANCE RENEWAL TRIO

Advanced Exfoliation & Radiance Protocol
for Spring and Summer

The Professional Radiance Renewal Trio is a flexible, results-driven exfoliation system designed for licensed skincare professionals. This three-phase protocol allows the esthetician to customize exfoliation intensity, improve skin texture, and enhance radiance while maintaining skin balance and integrity.

This system supports a layered approach to treatment allowing each product to be used

individually or in combination depending on the client's skin condition and treatment goals.

Professional Benefits

- Supports smooth texture and refined skin surface
- Enhances radiance and overall skin clarity
- Allows customized exfoliation control for all skin types
- Integrates easily into existing facial and corrective treatments
- Helps maintain balanced, healthy skin without over-exfoliation

How To Use (Professional Protocol for All Three)

Step 1: Pro-Radiance Peel: Saturate a dry 2x2 gauze with approximately 1-tablespoon of Pro-Radiance Peel. Apply 1 to 2 passes of Pro-Radiance to dry clean skin. Apply to the face, neck, and chest area. Let it absorb for 30 seconds to a minute.

Step 2: Skin Scrub Marine Algae Professional Product: Apply a thin to medium layer to dry skin. Perform light massage for 1-2 minutes.

Step 3: Papaya Complex: Apply a thin to medium application over the Skin Scrub marine algae. Manipulate for 1-2 minutes. Wet hands and massage for another 1-2 minutes. Remove with a "Room Temperature Moistened Towel." Follow with using Instant Soothing Toner: with a light touch blend with fingertips until absorbed. ***Please note all three products may be used together, separate, or may alternate with each client visit.***

Professional Flexibility

- Use each product individually based on skin condition
- Combine two phases for moderate exfoliation treatments
- Layer all three phases for corrective and radiance-focused protocols
- Adjust pressure, timing, and sequencing to maintain full treatment control

Integration with Modalities

This trio can be incorporated into advanced treatments, including:

- Microdermabrasion
- Dermaplaning
- Nano-pen (nano infusion)
- Oxygen infusion (O2 Skin Renewal System)
- Traditional facial protocols and so much more.

Enhances overall treatment performance while maintaining skin balance.

Best For

- Uneven skin tone and pigmentation
- Fine lines and wrinkles
- Dull, congested, or textured skin
- Seasonal skin preparation (year-round seasonal skin changes)

Skin Scrub Marine Algae

Refinement Phase

Apply a thin to medium layer to a dry clean skin. Manipulate product with fingertips. Use gentle massage movements for 1-2 minutes or until Skin Scrub starts to absorb.

Wet hands and massage for another 1-2 minutes. May use steam, wet soft facial brushes thoroughly and gently perform circular massage movement, or use a Sonic Skin Scrubber after wetting the skin.

Papaya Complex Enzyme Exfoliant

Activation Phase

Gently digests dead skin cells while maintaining skin balance. Ideal for preparing the skin without irritation.

Apply a thin to medium layer to a dry clean skin using a facial mask brush. Use fingertips to gently massage without water. Massage for 1-3 minutes. Then transition with wetting the hands. Massage for another 1-2 minutes.

May use steam, sonic skin scrubber device, or wet hands and perform a manual massage.

Pro Radiance Peel active brighteners

Resurfacing Phase

Gentle and effective peel for all skin types and complexions from Fitzpatrick I-VI. It is a leave-on peel. Do not have to neutralize.

Pour approximately 3 to 5 ML into a small glass bowl. Apply using a 2x2 esthetic gauze for the application process. Do not use a facial mask brush. Start with the forehead and work your way down.

May apply 1-3 passes. Let it dry for 30 seconds to a minute before moving to the next phase of the treatment.
